Hiring Manager, StoreSaathi

I'm writing to express my keen interest in the Frontend Web Developer Intern position at StoreSaathi. The opportunity to contribute to a next-gen POS and Business Management Platform for Indian businesses aligns perfectly with my passion for building impactful web applications. I'm eager to leverage my skills in React, Next.js, and Tailwind CSS to help develop your website and web app dashboard.

My resume highlights practical experience that I believe is relevant. I've built a real-time chat application using Next.js and Tailwind CSS, demonstrating my ability to create responsive user interfaces. Additionally, I have experience integrating REST APIs, as seen in my payment gateway microservice project where I handled over 5,000 simulated monthly transactions.

StoreSaathi's mission to empower Indian businesses resonates with me. I am a quick learner, highly motivated, and confident that I can contribute effectively to your founding team and gain valuable real-world startup experience.

Sincerely,  
SRAVAL NIKHRA
