Sree Valli  
HR Recruiter at IBaseIT

Dear Sree Valli,

I am writing to express my strong interest in the Golang Developer position for Carrier – Kidde Global Solutions in Hyderabad. With a foundation built on extensive DSA problem-solving and a passion for backend development, I'm eager to contribute to your team.

My resume highlights over 700 DSA problems solved and practical experience in building scalable applications. For instance, my "Payment Gateway Microservice" project involved developing a Go-based system handling 5,000+ simulated monthly transactions, integrating with APIs and utilizing Redis for caching. Additionally, my "REST API - Fast & Scalable" project demonstrated my ability to build efficient APIs in Go using modern Go features.

I am confident that my hands-on Golang skills, coupled with my proactive approach to learning and problem-solving, align well with the requirements of this role and the opportunity to work with AWS cloud solutions. I look forward to discussing how I can contribute to your client's success.

Sincerely,  
[Your Name]
